

INSTRUCTIONS MANUAL

1. Plug the AC power adapter in a wall outlet.
2. Connect the AC power adapter supplied with your charger to the DC in jack.
3. "STATUS" indicator shows RED when the charger is ready and "charger" indicator shows flashing GREEN when waiting for battery pack.
4. Slide battery pack in the Charger and "CHARGER" indicator goes RED when charging.
5. "CHARGE" indicator shows RED and GREEN alternatively when battery pack has more than 90% charged.
6. When the battery pack is fully charged, the "CHARGE" indicator shows a steady green.
7. After the battery pack fully charged, slide the battery pack out.
8. Unplug DC power, "CHARGE" and "STATUS" indicators go out.

ADDITIONAL SAFETY INSTRUCTIONS FOR YOUR CHARGER

1. If the charger supply cord is damaged have it replaced by a qualified person.
2. Do not charge a leaking battery.
3. Do not use machines, attachments and chargers for works other than those for which they are designed.
4. Only connect the charging device to an AC supply.
5. Only charge batteries with the appropriate charging device - as specified in these instructions.
6. The charger must be protected from moisture.
7. Do not use the charger outside.
8. Do not short out the contacts of charger.
9. Respect the polarity "+/-" when charging.
10. When charging batteries, ensure that the battery charger is in a well-ventilated area and away from flammable materials. Batteries can get hot during charging. Do not overcharge any batteries. Ensure that batteries and chargers are not left unsupervised during charging.
